Build on the research of others; eliminate research redundancy; quickly find out what other researchers are discovering; receive alerts on your latest science topics of interest; search 200 million pages of science from web pages and databases; get relevancy ranked results; easily download results for research.

Science.gov increasing vital role in education, innovation and discovery

“Congratulations to all the federal science agencies involved in Science.gov for making the best government science data accessible to the millions of Spanish-speaking Americans across our country,” said Secretary of the Interior Ken Salazar. “I encourage students, teachers, researchers, engineers and members of the public to take advantage of the new Spanish version of this valuable federal science portal. The web site will help increase the vital role of U.S. scientific information in education, innovation and discovery, and will help encourage Latino communities to promote careers in the fields of science, technology, engineering and mathematics.”

Providing transparency

"Nice to see our government providing some transparency as well as using authentic and well proven indexing and cataloging processes.”
